## PROFESSIONAL SUMMARY

Client relationship and operations professional with 4+ years of experience across client management, visa and migration documentation, data operations, and digital content. Skilled in owning client records end to end: verifying documents, tracking case status, and maintaining structured databases of 4,000+ records with a focus on accuracy and retrievability. Combines direct client advising and target ownership with hands-on data handling, reporting, and process automation, including an AI-powered omnichannel outreach platform designed and built independently. Proficient in Microsoft Excel, CRM and CMS platforms, Google Workspace, and data visualization tools.

## CORE COMPETENCIES

**Client & Relationship Management:** Client Relationship Management • Client Communication • Customer Service • Needs Assessment • Client & Student Advising • Follow-up & Retention • Consultative Sales • Lead Follow-up

**Documentation & Operations:** Document Verification • Record & File Management • Case & Status Tracking • Data Entry & Processing • Data Validation & Quality Control • Data Categorization • Administrative Coordination • Cross-Functional Coordination

**Analysis & Reporting:** Data Analysis & Interpretation • Reporting & Documentation • Performance Tracking • Information Verification • Research & Data Collection • Process Improvement

**Tools & Technology:** Microsoft Excel • Microsoft Word & Office • Google Workspace • CRM Systems • CMS Platforms • Data Visualization Tools • Adobe Creative Suite • Final Cut Pro • Python (basic) • Git & GitHub

## PROFESSIONAL EXPERIENCE

### Client Relationship Manager

Aug 2026 – Present

*Toppers Academy | Dhaka, Bangladesh*

- Manage the full client and student lifecycle for IELTS and study-abroad services, from first enquiry to enrollment, maintaining accurate and up-to-date records across operational tracking systems.
- Advise students on IELTS preparation, test options, and study-abroad pathways, guiding them through application requirements and next steps.
- Process visa applications and prepare supporting documentation, identifying missing or inconsistent information and coordinating corrections before submission.
- Track follow-ups, case status, and ongoing client activity to support timely service delivery and reliable operational reporting.
- Coordinate between students, teachers, and internal teams to schedule classes and keep client documentation complete and organized.

### Client Relationship Executive

Jan 2026 – Aug 2026

*Sonali Sourav Tours & Travels | Dhaka, Bangladesh*

- Served as primary point of contact for migration and visa clients, maintaining accurate case files and consistent follow-up throughout each application.
- Verified visa and manpower documentation for accuracy and completeness before submission, reducing errors in client filings.
- Prepared and submitted visa forms and tracked application status through to closure, keeping clients informed of required actions.
- Coordinated with travel agents, manpower suppliers, and consulates to progress cases and resolve documentation issues.
- Maintained client records and delivered regular case updates, keeping information organized and retrievable across the team.

### Content Manager

Sep 2025 – Dec 2025

*ICT Layer | Dhaka, Bangladesh*

- Managed digital content and campaign assets across CMS platforms, tracking performance metrics tied to a 35% increase in audience engagement.
- Analyzed user-interaction data and ran A/B tests on content formats to guide lead-generation and engagement decisions.
- Owned the content calendar and coordinated designers and developers, delivering 100% of releases on schedule.

### Data Operator

Feb 2024 – Aug 2025

*Nitex | Dhaka, Bangladesh*

- Processed, organized, and maintained structured datasets covering 4,000+ products in Excel, ensuring data accuracy for stakeholder reporting.
- Designed automated data-categorization structures that cut manual retrieval time and resolved operational bottlenecks by 30%.
- Compiled and visualized inventory and supply-chain metrics to support senior leadership's stocking and planning decisions.

- Audited incoming department data for errors and inconsistencies, correcting records to maintain a single reliable source of truth.

**Video Editor**

Sep 2023 – Dec 2023

Digital Dropouts | Dhaka, Bangladesh

- Edited 30+ long-form and short-form video projects in Final Cut Pro, supporting a 20% increase in client social media engagement.

**Sales & Support Representative**

Apr 2022 – Aug 2023

10 Minute School | Dhaka, Bangladesh

- Handled inbound telesales and advising conversations, matching 50+ students daily with relevant course offerings based on their needs and academic level.
- Tracked conversion and customer-satisfaction metrics, consistently exceeding monthly targets and holding a 95% satisfaction score.

**EARLY CAREER**

**Graphic Designer (Intern), UY Lab** — Flyers, posters, and marketing collateral to client brand guidelines. Apr 2021 – Jun 2021

**Sales Executive, Puma Bangladesh** — Retail sales, upselling, and B2C customer service. May 2019 – Oct 2019

**Sales Associate, Aarong** — Retail sales and customer service. Apr 2017 – May 2018

**KEY PROJECTS**

**Bulkly V3 — AI-Powered Omnichannel Outreach Platform** 2026

Independent Project | Sole Designer & Developer

- Designed and built a desktop platform that unifies client outreach across WhatsApp, Instagram, Facebook Messenger, Telegram, and Threads for travel and migration agencies.
- Integrated the Google Gemini API for context-aware smart replies and built dynamic campaign-template generation across three message tones.
- Automated bulk messaging with Selenium WebDriver, built the interface in Python and CustomTkinter, and shipped it as a standalone Windows executable.
- Stack: Python, CustomTkinter, Selenium WebDriver, Google Gemini API, FastAPI, Next.js, PyInstaller. Repository: [github.com/tasnimsarder42-hash/Project-Bulkly](https://github.com/tasnimsarder42-hash/Project-Bulkly)

**Product Catalogue Database Architecture**

Apr 2024 – Jun 2024

Nitex | Dhaka, Bangladesh

- Problem: disorganized physical-inventory tracking was creating supply-chain delays and repeated manual searches.
- Action: built a centralized digital database for 4,000+ unique products and designed a QR-based SKU system to automate inventory identification.
- Result: improved inventory identification speed by 80%, eliminated manual search errors, and established consistent data accuracy across the organization.
